# Benefits of Using Technology in the Classroom

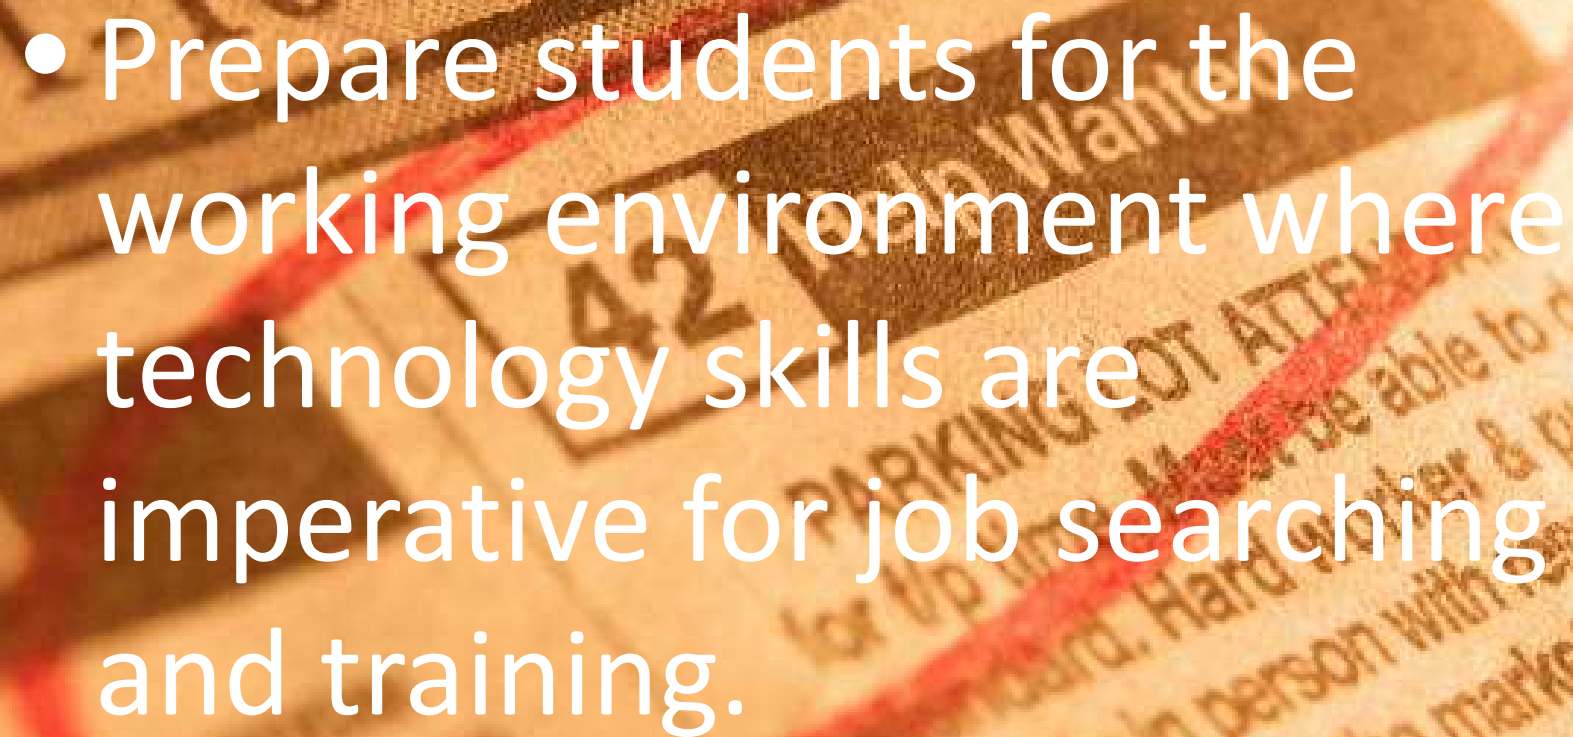

- More student involvement, so students aren't bored and inactive.

- Expand cooperative  
lea

- 
- A close-up photograph of a newspaper classifieds page. A red circle is drawn around a job listing. The text in the listing includes "42", "PARKING LOT ATTEN", "Apply in person with resume at", and "George St. in the market. Fax". Other visible text includes "ratio AA", "1011", and "Wanted".
- Prepare students for the working environment where technology skills are imperative for job searching and training.

- Connect to real life situations

- Offer challenging opportunities that promote risk taking

# Assist teachers in

- Developing interactive lessons
- Organization and grading policies
- Motivating students for involvement
- Reducing time gaps
- Preparing students for the real world
- Keeping students on task and interested

Teachers need to:

- Be trained in technology
- Be competent to use in classroom
- Actively engage all students
- Receive ongoing training
- Be required to incorporate into lesson planning
- Be the expert of technology use

A man with sunglasses on his head, wearing a red shirt, is holding a silver digital camera. He is looking directly at the camera with a wide-eyed, intense expression. In the foreground, a large hand is pointing its index finger directly at the viewer, partially obscuring the man's face. The background is a green and black checkered pattern.

## Types of technology used in classrooms today

- Active boards
- Projectors
- Document cameras
- Student computers
- Shared networks
- Internet
- Digital imaging
- Web development programs
- Art Design and Media production

- **Students enjoy learning through technology, they love the hands on experience, they enjoy working with their team members!**
  
- **Most students complain about being bored, with technology this can be the main solution!**
